

Attention: Docket ID number OPP-2003-0092

EPA should not revoke tolerances in 40 CFR 180.434 for the combined residues of the propiconazole and its metabolites in or on, poultry and eggs. Propiconazole is going through reregistration and as a result registrant might be required to conduct new studies and there might be residues in poultry and egg samples. Therefore, Syngenta objects to revoking the propiconazole tolerances in poultry and egg at this time. If you have any questions, please feel free to contact me.
